

VEGA VIBRANT+

Owing to our commitment towards consumer safety and sustainable development, we present to you 'VEGA', our range of mineral oil-free inks.

It is an endeavour from all of us at Siegwerk to significantly reduce the usage of mineral oil in the packaging industry and make inks safe for all.

VEGA Vibrant+ is a state of the art, 'base colour' series designed to meet all the requirements of the packaging industry. A wide range of base colours that can match any pantone or special shade, very high colour strength and stable ink-water balance are some of the many qualities that make this series so special.

Due to oxidative drying mechanism and usage of special resin system, this series is always able to outperform during post printing operations. It consists of a range of light fast and high chemical resistance colours making it ideal to perform on different machines under varied climatic conditions.

BENEFITS

- ✓ Very high colour strength
- ✓ More than 20 base colours to cover a wider gamut of special / pantone shades
- ✓ No fanal colour is part of series which makes this series the safest for food & pharma packaging
- ✓ Excellent roller stability & ink transfer properties
- ✓ Very wide ink-water balancing window which make this series most robust to perform on wide range of machines and press conditions
- ✓ Higher rheology with medium tack and long flow make this series suitable to perform at latest high-speed presses (16-18 K /Hr.)
- ✓ Excellent and consistent dot sharpness in half tone area and constant colour intensity in solid and colour trapping area
