

Declaration of non use of Organotin compounds of concern

In the manufacture of **all** products supplied by Siegwirk, organotins¹, or raw materials containing organotins, are not used as intentionally added ingredients.

In particular the following organotins are excluded:

- Tetrabutyltin (TTBT), CAS 1461-25-2 and equivalent tetraalkyltins
 - Triphenyltins (TPT), Tributyltins (TBT) and equivalent trialkyltins
 - Dibutyltins (DBT), Dioctyltins (DOT), Dimethyltins (DMT) and equivalent dialkyltins
 - Monobutyltins (MBT), Monooctyltins (MOT), Methyltins (MMT) and equivalent monoalkyltins
- and all their oxides, hydroxides, chlorides, acetates, laurates,...

The presence, however, of traces of these substances in the product coming from raw material impurities, from the process or as adventitious contaminant cannot be excluded. We proactively monitor and/or retrieve supplier data on minute contents or impurities in raw materials likely to contain traces of organotins.

We can in any case assure you that potential traces of organotins in our products, if any, well below 0.1%.

¹ Please note that inorganic tin salts are not organotins.

The information in this document reflects Siegwirk's policy and commitments. This statement is valid without signature.
