

**Declaration of non use of
Persistent Organic Pollutants (POPs)
covered by
Regulation (EU) 2019/1021**

In the manufacture of **all** products supplied by Siegwerk, persistent organic pollutants listed in annex I, III or IV of Regulation (EU) 2019/1021 and its amendments, or raw materials containing these substances are not used as intentionally added components.

However, the presence of very minute but analytically detectable traces of these substances in the product originating from raw material impurities, or as adventitious contaminants, cannot be fully excluded. We proactively monitor and/or retrieve supplier data on impurities in raw materials likely to contain traces of these substances. We can assure you that, according to the present scientific knowledge, potential traces of these substances in our products, if any, are far below 0.1%.

The information in this document reflects Siegwerk's policy and commitments. This statement is valid without signature.
